

NGS Validation Services designed with your lab in mind

Velsera offers end-to-end test validation services to help you achieve compliance, secure regulatory approval, and streamline operations. Our Validation team is here to help you from SOP development and training to ensuring your processes meet CAP/CLIA standards. Whether you're new to NGS or highly experienced, our solutions are tailored to your needs.

COMPREHENSIVE SUPPORT FOR YOUR NGS JOURNEY

Our services simplify the preparation and activation of NGS programs, including Validation and Concierge Services for LDT assays. Whether you're launching a new program or expanding an existing one, we ensure your lab is ready to operate efficiently and meet all quality standards.

RIGHT-SIZED PACKAGES FOR YOUR NEEDS

Our NGS validation services may include:

- Client Sample Tracking Sheet
- Supported Analytical Control List
- Full Validation Plan and Run Structure
- Full Validation Report
- Gap Assessment Service
- Weekly call with our Clinical Genomic Scientists
- SOP Service
- Nucleic Acid Extraction Validation
- Go-Live Support
- Lab Layout

Optional add-on services:

- Revenue Cycle Management
- Somatic and Germline Variant Interpretation Service
- Mock Audit available at reduced price after customer go-live

Over a Decade of Expertise, You Can Trust

With over 10 years of experience partnering with labs to launch testing programs, we know what it takes to get you operational faster. Our clinical services get you up and running, while our Clinical Genomics Workspace software makes it easy to scale your operation through speed and automation, without compromising quality and clinical utility.

TRUSTED BY LEADING LABORATORIES

“I knew that with the resources we had, there was no way to create something that would rival a system like Clinical Genomics Workspace. As we’ve set up reflex testing in various cancer types, we have been well supported to scale the massive undertaking.”

Medical Director, Academic Medical Center.

MAKE ACCURACY YOUR STANDARD.
